Portfolio:

Professional Summary

Results-driven entry-level full-stack developer with hands-on experience building modern web applications using JavaScript, React, Node.js, and collaborative workflows. Developed user-centric platforms like StudentsHub (student job marketplace) and CarbonIQ (carbon footprint tracker with analytics). Strong in UI/UX design, problem-solving, software testing, and delivering scalable solutions. Eager to contribute to innovative teams in dynamic tech environments.

Skills

- Full-Stack Development
- JavaScript (ES6+), React,
- HTML5, CSS3, Responsive & Mobile-First Design
- UI/UX Design & Prototyping
- Software Testing (Unit, Integration)
- RESTful APIs & Backend Development
- Databases (MongoDB, SQL)
- Git & Version Control
- Agile Methodologies & Team Collaboration
- Problem Solving & Debugging
- Mobile App Development Basics

Education

Bachelor of Science in Software Engineering Expected Graduation: November 2025
Eldoret PolyTechnic Eldoret, Kenya

Moringa School – Full-Stack Software Engineering Certificate Completed: May-2025
November 2025

- Intensive bootcamp focused on industry-standard full-stack development
- Built real-world projects using HTML, CSS, JavaScript, React, Node.js, Express, and relational databases
- Emphasized collaborative workflows, agile practices, code quality, and deployment

Professional Experience

Freelance Full-Stack Developer / Self-Employed Nairobi, Kenya **October 2025 – Present**

StudentsHub – Full-Stack Job & Internship Platform

- Engineered a centralized web application connecting students to opportunities using React frontend and Node.js/Express backend.
- Implemented user authentication, profile management, job discovery, application tracking, and employer dashboards.
- Streamlined application workflows for enhanced user experience and efficient student-employer interactions.
- Applied responsive design and UI/UX best practices to improve accessibility and engagement.

CarbonIQ – Interactive Carbon Footprint Tracker

- Developed a collaborative full-stack app for tracking and reducing carbon emissions via data input and personalized analytics.
- Integrated data visualization tools and insights to empower users with actionable sustainability recommendations.
- Combined modern frontend design (React) with robust backend architecture for secure data handling.
- Promoted environmental impact through user-friendly features and real-time feedback.

Additional Information

- Proven ability to deliver clean, maintainable code in freelance and team settings.
- Committed to continuous learning and staying current with emerging technologies.
- Available for immediate start; seeking full-time roles in Nairobi or remote.
